

SwISTEM Summer Camp

GO STEM! Summer Camp

Bring a girlfriend and come spend a summer week on the beautiful campus of the University of Southern Indiana. During the **Girls Only (GO) STEM! Camp**, you and twenty-three other young ladies from all corners of the United States will spend time participating in a variety of hands-on activities designed to help you better understand the multitude of career opportunities that await you when you embark on a STEM-focused post-secondary education. Activities that will be included in this experiences are: coding, engineering, 3D printing, healthcare, advanced manufacturing, and e-textiles. Also, as a part of the experience, a field trip will be taken to the [Toyota Motor Manufacturing](#) plant and [Holiday World & Splashin' Safari](#) in Santa Claus, Indiana where data will collected and observations made pertinent to engineering principles. Campers can also look forward to rock-climbing at USI's new indoor [climbing facility](#), hiking the picturesque [USI-Burdette Trails](#), and growing accustomed to college life in one of USI's many [residence halls](#). Female STEM majors

will be on hand all week to mentor campers, giving each camper the opportunity to build a lasting and valuable support network.
